An Update on Housing Market and Mortgage Performance in Virginia
3rd Quarter, 2011
Summary of Findings

This report analyzes the size, composition, and performance of prime and subprime home mortgages in Virginia. It also provides information on trends in the state's housing market and charts with metropolitan area and county level data.

State Delinquency and Foreclosure Rates

- The total foreclosure rate in Virginia rose from 1.8 percent to 2.3 percent over the year ending September 2011. Over the same period, the delinquency rate fell 0.5 percentage points to 3.1 percent. (Table 7)
- The prime foreclosure rate in Virginia rose from 1.3 percent to 1.5 percent from September 2010 to September 2011. Over the same period, the prime 90+ day delinquency rate decreased from 2.5 percent to 2.3 percent. (Table 8)
- The subprime foreclosure rate increased year-over-year from 8.2 percent to 12.3 percent while the 90+ day delinquency rate slid from 18.2 percent to 13.0 percent. (Table 9)
- Subprime mortgages made up 31.5 percent of Virginia's foreclosure inventory in the third quarter, though they made up only 7.2 percent of all mortgages. Virginia is ranked 42nd in the nation in its share of subprime loans. (Figure 2 and Table 4)

Metro Area Highlights

- The Winchester MSA had the highest subprime default rate in the state (18.9 percent) in September. However, it was the Richmond MSA, followed closely by the Virginia Beach MSA, that had the highest share of subprime mortgages with payments more than 90 days past due (15.1 percent and 15.0 percent, respectively).
- The Winchester MSA also had the highest prime foreclosure rate in the state (1.8 percent) and the Richmond MSA had the highest prime 90+ day delinquency rate (3.0 percent). (Table 8)
- The Virginia portion of the Washington, DC MSA continued to post the highest share of adjustable rate and interest-only mortgages in the state, although the Danville metro area had the highest share of subprime loans (12.5 percent) in September.

State Economic Conditions and Looking Forward

- Declining house prices play a significant role in rising default, and continued depreciation in Virginia will impede a notable decline in delinquency and foreclosure. House prices in Virginia rose 0.9 percent in the third quarter, but continued to depreciate on a year-over-year basis and fell 14.2 percent since the second quarter of 2007.
- An income shock to a household—such as unexpected unemployment—can affect the household's ability to repay a mortgage. The Virginia unemployment rate (NSA) was 6.4 percent in September 2011. Although this is high for the state, joblessness remains well below the national 8.8 percent mark. (Table 11)

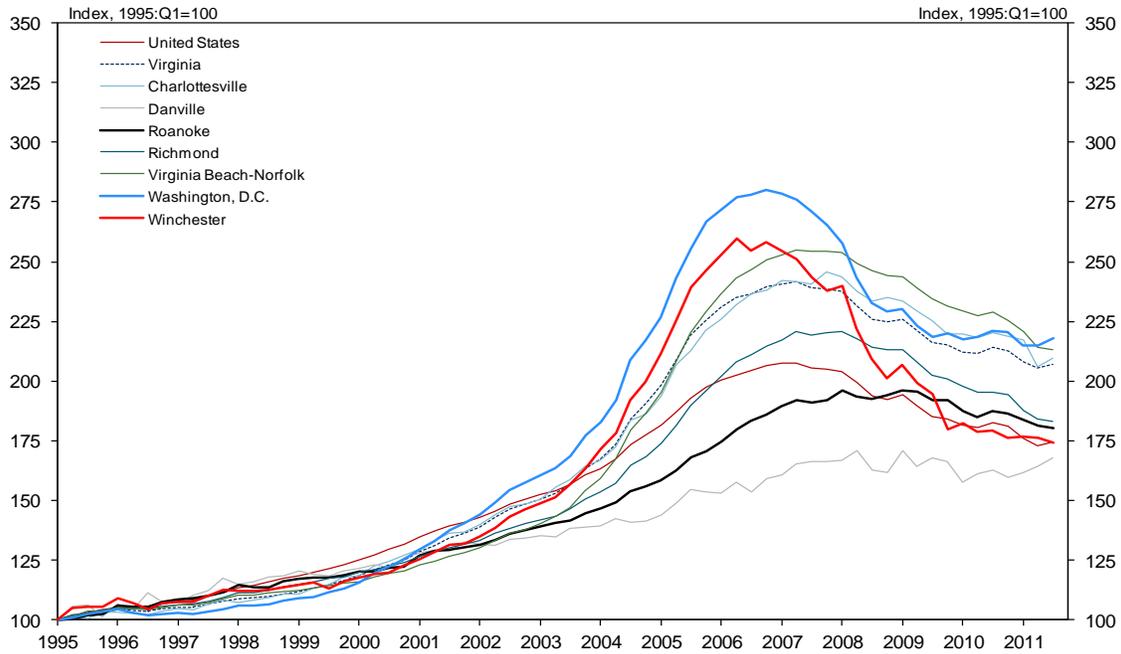

For more information on foreclosures, please visit the Richmond Fed's Foreclosure Center at http://www.richmondfed.org/community_development/foreclosure_resource_center/

House Price Index

Federal Housing Finance Agency/Haver Analytics

Weighted repeat sales index, measuring the average price changes in repeat sales or refinancing on the same single family properties. Based on transactions involving conforming, conventional mortgages purchased or securitized by Fannie Mae or Freddie Mac.

Unemployment Rate

Bureau of Labor Statistics/Haver Analytics

General Housing Statistics

Census Bureau

Metropolitan Statistical Area Definitions

Office of Management and Budget, 2008

Loan Distribution and Loan Performance

(1) Mortgage Bankers' Association/Haver Analytics

(2) Loan Processing Services Inc. Applied Analytics Mortgage Data

Loan Processing Services, Inc. Applied Analytics Mortgage Data (LPS Data) does not have as complete coverage of subprime loans as it does of prime loans. To compensate for this, we scaled the LPS subprime and prime data for each locality by common factors such that the LPS totals matched the MBA data at the state level. While this method of dealing with LPS's underrepresentation of loans is far from perfect, it only impacts the figures and tables that report the prevalence of subprime loans within geographic areas of Virginia. It has no impact on the prime or subprime performance numbers.

Loan Processing Services, Inc. made a large enhancement to the Applied Analytics Mortgage Data (LPS Data) in November 2010 with the addition of several servicers. Performance numbers for the added servicers date back to January 2008. Historical rates may have changed in this version of the Mortgage Performance Summaries from previous versions.

The LPS data in this document is subject to revision.
