

**MY MONEY CAN BE USED TO COVER THE FOLLOWING
NORTH CAROLINA STANDARDS OF LEARNING FOR
K-3 SOCIAL STUDIES AND MATH**

SS (History and Economics)

- K.4 The student will explain celebrated holidays and special days in communities.
- K.6 The student will apply basic economic concepts to home, school, and the community. The student will
 - a) distinguish between wants and needs
 - b) identify examples of how families and communities work together to meet their basic needs and wants
 - c) give examples of how money is used within the communities, such as spending and saving
 - d) explore goods and services provided in communities

Math

- K.2 The student will explore concepts of measurement.
- K.5 The student will model simple patterns and sort objects.

SS (History and Economics)

- 1.4 The student will explain different celebrated holidays and special days in communities. The student will recognize celebrated individuals and historical events associated with national holidays.
- 1.6 The student will apply basic economic concepts to home, school and the community. The student will identify the uses of money by individuals, which include saving and spending.

Math

- 1.1 The student will create, model, and solve problems that use addition and subtraction.
- 1.5 The student will demonstrate an understanding of classification and patterning. The student will use Venn diagrams to illustrate similarities and differences in two sets.

SS (History and Economics)

- 2.7 The student will apply basic economic concepts and evaluate the use of economic resources within communities. The student will
 - a) distinguish between producers and consumers and identify ways people are both producers and consumers
 - b) distinguish between goods produced and services provided in communities
 - c) describe different types of employment and ways people earn an income

Math

- 2.1 The student will read, write, model and compute with whole numbers.
- 2.4 The student will understand and use data. The student will collect, organize, describe and display data using Venn diagrams.

SS (History and Economics)

- 3.5 The student will apply basic economic principles to the study of communities.
- 3.7 The student will analyze the role of real and fictional heroes in shaping the culture of communities.

Math

- 3.1 The student will model, identify, and compute with whole numbers. The student will use basic properties for addition, subtraction, multiplication, and division.
- 3.4 The student will understand and use data and simple probability concepts. The student will collect, organize, analyze, and display data (including Venn diagrams).
