Board of Governors of the Federal Reserve System

Annual Report of Holding Companies—FR Y-6

Report at the close of business as of the end of fiscal year

This Report is required by law: Section 5(c)(1)(A) of the Bank Holding Company Act (12 U.S.C. § 1844(c)(1)(A)); sections 8(a) and 13(a) of the International Banking Act (12 U.S.C. §§ 3106(a) and 3108(a)); sections 11(a)(1), 25, and 25A of the Federal Reserve Act (12 U.S.C. §§ 248(a)(1), 602, and 611a); and sections 113, 165, 312, 618, and 809 of the Dodd-Frank Act (12 U.S.C. §§ 5361, 5365, 5412, 1850a(c)(1), and 5468(b)(1)). Return to the appropriate Federal Reserve Bank the original and the number of copies specified.

NOTE: The Annual Report of Holding Companies must be signed by one director of the top-tier holding company. This individual should also be a senior official of the top-tier holding company. In the event that the top-tier holding company does not have an individual who is a senior official and is also a director, the chairman of the board must sign the report. If the holding company is an ESOP/ESOT formed as a corporation or is an LLC, see the General Instructions for the authorized individual who must sign the report.

Independent Auditors' Report

Board of Directors and Stockholders of Congressional Bancshares, Inc.

We have audited the accompanying consolidated financial statements of Congressional Bancshares, Inc. and subsidiary which comprise the consolidated balance sheets as of December 31, 2017 and 2016, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Congressional Bancshares, Inc. and subsidiary as of December 31, 2017 and 2016, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Note 1 - Summary of Significant Accounting Policies

Nature of Operations

Congressional Bancshares, Inc. (Bancshares) is a Maryland-chartered holding company serving the needs of individuals, small and medium sized businesses and professional concerns in the Washington, DC Metropolitan area. Bancshares operates Congressional Bank, a wholly owned subsidiary, as a community bank, emphasizing personal service and flexibility in the face of increasing standardization by the large national and super-regional banks who maintain local branch networks. The Bank began operations and opened its first branch location in Potomac, Maryland in October 2003. Bancshares provides full service commercial banking to individuals and businesses. Services include accepting deposits and extending real estate, consumer and commercial loans and lines of credit in and outside the Washington, DC Metropolitan area.

Subsequent Events (Unaudited)

On January 31, 2018, Congressional Bancshares, Inc. and Congressional Bank acquired the operating business and a substantial portion of the assets of Alliance Partners LLC. Alliance Partners will be operated as a subsidiary of Congressional Bank.

For the acquisition, Congressional paid to Alliance approximately \$100 million, payable in cash and 750,000 shares of Congressional Bancshares common stock ("Common Stock"). Based on 9,744,640 shares of Common Stock outstanding immediately prior to the closing of the acquisition, the 750,000 shares constitute approximately 7.1% of the Common Stock. As of the date of the merger, Congressional acquired approximately \$80 million of assets.

Management has considered material subsequent events for disclosure and recognition through March 26, 2018 the date the consolidated financial statements were available to be issued, and concluded that no subsequent events have occurred that would require recognition or disclosure in the consolidated financial statements except as described above.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Basis of Presentation and Principles of Consolidation

The accompanying consolidated financial statements are presented in accordance with accounting principles generally accepted in the United States of America, as applicable to financial institutions, and include the accounts of Bancshares and Congressional Bank (collectively "the Bank"). All significant inter-company accounts and transactions have been eliminated in consolidation.

Reclassifications

Certain reclassifications have been made to prior period balances to conform to the current year presentation with no impact on net income or stockholders' equity as previously reported.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses, the valuation of the deferred tax asset and determination of fair value of financial assets and liabilities.

Concentration of Credit Risk

The Bank offers commercial and industrial loans, specialized lending, such as health care asset-based loans and participations in larger syndicated loans in and outside of the Washington, DC Metropolitan area. Interest bearing deposits in banks are held in several financial institutions, and the balances in these accounts, at times, exceed FDIC insurance limits. Deposits are largely obtained from customers in the Washington, DC Metropolitan area.

Cash and Cash Equivalents

Cash and cash equivalents include cash and due from banks for the purpose of the statement of cash flows.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Interest Bearing Deposits in Other Banks

Interest bearing deposits in other banks include money market accounts that have no maturity date and are carried at cost. The Bank also has certificates of deposits in banks with remaining maturities of nine months at December 31, 2017, and with remaining maturities of nine months at December 31, 2016.

Investment Securities

Debt securities are classified as held-to-maturity when the Bank has the positive intent and ability to hold the securities to maturity. Securities held-to-maturity are carried at amortized cost. Debt securities not classified as held-to-maturity and equity securities with readily determinable fair values are classified as available-for-sale and are carried at fair value with unrealized gains (losses) reported in accumulated other comprehensive income. Realized gains (losses) on securities available for sale are included in other income and, when applicable, are reported as a reclassification adjustment, net of tax, in other comprehensive income. Gains and losses on sales of securities are determined using the specific-identification method.

The Bank determines the appropriate classification of securities at the time of purchase. The amortization of premiums and accretion of discounts are recognized in interest income using methods approximating the interest method over the period to maturity.

The cost basis of individual securities is written down through a charge to earnings when declines in fair value below amortized cost are considered to be other than temporary. In cases where fair value is less than amortized cost and the Bank intends to sell a debt security, it is more likely than not to be required to sell a debt security before recovery of its amortized cost basis, or the Bank does not expect to recover the entire amortized cost basis of a debt security, an other-than-temporary impairment is considered to have occurred. If the Bank intends to sell the debt security or more likely than not will be required to sell the security before recovery of its amortized cost basis, the other-than-temporary impairment is recognized in earnings equal to the entire difference between the debt security's amortized cost basis and its fair value at the balance sheet date. If the Bank does not expect to recover the entire amortized cost basis of the security, the Bank does not intend to sell the security and it is not more likely than not that the Bank will be required to sell the security before recovery of its amortized cost basis, the other-than-temporary

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

impairment is allocated between (a) the amount representing the credit factors and (b) the amount related to all other factors. Once allocated, the amount of the other-than-temporary impairment related to credit factors is recognized in earnings while the amount related to other factors is recognized as a component of other comprehensive income, net of applicable taxes. Subsequently, the Bank accounts for the other-than-temporarily impaired debt security as if the security had been purchased on the measurement date of the other-than-temporary impairment at an amortized cost basis equal to the previous amortized cost basis less the other-than-temporary impairment recognized in earnings. The cost basis of individual equity securities is written down to estimated fair value through a charge to earnings when declines in value below cost are considered to be other than temporary.

Federal Home Loan Bank Stock

Federal Home Loan Bank (FHLB) stock represent required investments in the common stock of a correspondent bank. These securities do not have a readily determinable fair value as their ownership is restricted, and they lack an active market for trading. Additionally, all repurchases of such stock occur at par. Accordingly, these securities are carried at cost, and are periodically evaluated for impairment.

The Bank's determination as to whether its investment in FHLB and FRB stock is impaired is based on management's assessment of the ultimate recoverability of its par value rather than recognizing temporary declines in its value. The determination of whether the decline affects the ultimate recoverability of our investment is influenced by available information regarding various factors. These factors include, among others, the significance of the decline in net assets of the issuing banks as compared to the capital stock amount reported by these banks, and the length of time a decline has persisted; commitments by such banks to make payments required by law or regulation and the level of such payments in relation to the operating performance of the issuing bank; and the overall liquidity position of the issuing bank. Based on its most recent analysis of publicly available information regarding the financial condition of the issuing banks, management concluded that no impairment existed in the carrying value of this stock.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Loans Held for Sale

Loans originated and intended for sale in the secondary market are carried at fair value. Gains and losses on loan sales (sales proceeds minus carrying value) are recorded in other income, and direct loan origination costs and fees are deferred and are included in the determination of the gain or loss on sales. Loans are sold on a servicing released basis, therefore there is no intangible asset recorded for the value of such servicing.

Derivatives

Derivatives are recognized as assets and liabilities on the consolidated balance sheets and measured at fair value. For non-exchange traded contracts, fair value is based on dealer quotes, pricing models, discounted cash flow methodologies, or similar techniques for which the determination of fair vale may require significant management judgment or estimation.

The Bank enters into interest rate lock commitments to originate residential mortgage loans whereby the interest rate on the loan is determined prior to funding. These interest rate lock loan commitments that relate to the origination of a mortgage loan to be held for sale upon funding are considered derivative instruments under the derivatives and hedging accounting guidance. Loan commitment that are derivatives are recognized at fair value on the consolidated balance sheets in other assets. Interest rate lock commitments totaled \$917,618 and \$215,896 as of December 31, 2017 and 2016, respectively.

The Bank evaluates all loan sale agreements to determine whether they meet the definition of a derivative. To protect against the price risk inherent in derivative loan commitments, the Company sells loans on both a "mandatory delivery" and "best efforts" basis to mitigate the risk of potential decreases in the value of loans that would result from the derivative loan commitments. The Bank also uses mortgage-backed security hedges and pairoffs to mitigate interest rate risk by entering into securities and mortgage-backed securities trades with brokers.

Loans

Interest on loans is accrued and credited to income based on the principal amount and contract rate on the loan. Loan origination fees and certain direct origination

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

costs are deferred and recognized on a net basis as an adjustment to the yield on the related loans using the interest method. Accrual of interest is discontinued when, in the opinion of management, there is an indication that the borrower may be unable to meet future payments as they become due, generally when a loan is 90 days past due. The accrual of interest on some loans, however, may continue even after the loan becomes 90 days past due in special circumstances that management deems appropriate. When interest accrual is discontinued, all unpaid accrued interest is reversed. While a loan is in non-accrual status, interest is recognized as cash is received. Loans may be returned to accrual status when the loan is brought current by the borrower and, in the judgment of management, the ability to collect the remaining principal and interest is no longer in doubt.

Loans that management has the intent and the ability to hold for the foreseeable future or until maturity or payoff are carried at principal balances outstanding, reduced by any charge-off or specific valuation accounts and net of any deferred fees or costs on originated loans and allowance for loan losses.

Loans Acquired

Loans acquired through the completion of a transfer, including loans acquired in a business combination, that have evidence of deterioration of credit quality since origination and for which it is probable, at acquisition, that the Company will be unable to collect all contractually required payments receivable are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance. The difference between the undiscounted cash flows expected at acquisition and the investment in the loan, or the "accretable yield," is recognized as interest income on a level-yield method over the life of the loan. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the "nonaccretable difference," are not recognized as a yield adjustment or as a loss accrual or a valuation allowance. Significant increases in expected cash flows subsequent to the initial investment are recognized prospectively through adjustment of the yield of the loan over its remaining life. Decreases in expected cash flows are recognized as Valuation allowances on these impaired loans reflect only losses incurred after the acquisition (meaning the present value of all cash flows expected at acquisition that ultimately are not to be received).

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

For loans acquired which are not considered to have deteriorated credit quality at acquisition, the difference between the loan's principal balance at the time of purchase and the fair value is recognized as an adjustment to yield over the life of the loan.

Loan Fees and Costs

Non-refundable fees and certain direct costs associated with the origination of loans are amortized to income over the contractual life of the related loans and recognized as fee income should a payoff occur early. Recognition of deferred fees and costs as fee income are discontinued on non-accrual loans until they return to accrual status or are charged-off.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to operations. Loans are charged-off against the allowance when management believes the inability to collect the remaining, unpaid loan balance has been confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, growth and composition of the loan portfolio, delinquency trends, economic conditions, and various other qualitative factors. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as subsequent information becomes available. While the Bank uses the best information available in making its evaluation, future additions to the allowance for loan losses may be necessary.

The allowance for loan losses consists of specific and general components, as follows:

A specific allowance is established for impaired loans. A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

probability of collecting scheduled payments when due. Loans that experience insignificant delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis by either the present value of future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral less costs to sell if the loan is collateral dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Bank does not separately identify individual consumer and residential loans for impairment disclosures.

The general component of the allowance for loan losses is established for loans that do not meet the definition of impaired. To calculate the general component of the allowance for loan losses, the loan portfolio is grouped into loans with similar risk characteristics, primarily by regulatory classification. An estimated loss rate is applied to each group based on historical loss factors adjusted, as appropriate, by various qualitative factors.

In certain circumstances, the Bank may agree to grant a concession or loan modification to a borrower experiencing financial difficulty that it would not otherwise consider. The Bank classifies loans with such modifications or concessions as troubled debt restructurings. Troubled debt restructurings are separately identified for disclosure purposes, and impairment is measured using the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered a collateral dependent loan, the loan is reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Company determines the amount of reserve in accordance with the accounting policy for the allowance for loan losses. Impairment related to troubled debt restructurings is recognized through the specific component of the allowance for loan losses.

Off-Balance Sheet Instruments

In the ordinary course of business, the Bank enters into off-balance-sheet financial instruments consisting of commitments to extend credit, commercial letters of credit,

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

standby letters of credit and interest rate lock commitments. Such financial instruments are recorded in the financial statements when they are funded.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales when control over the assets has been relinquished. Control over transferred assets is deemed to be surrendered when the assets have been isolated from the Company, the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and the Bank does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Bank Premises and Equipment

Bank premises and equipment are reported at cost less accumulated depreciation and amortization. Depreciation and amortization are recorded using the straight-line method over the estimated useful life of the related asset as follows: furniture and equipment, 3 to 7 years, software 3 to 5 years. Amortization of leasehold improvements is recognized over the lesser of the estimated useful life of the asset or the term of the lease. Maintenance and repairs are charged to operating expense as incurred.

Accrued Interest Receivable

Interest on loans is recognized as earned. Accrual of loan interest is discontinued and a reserve established on existing accruals if management believes that after considering collateral value, economic and business conditions and collection efforts, the borrower's financial condition is such that collection of interest is doubtful.

Other Real Estate Owned (OREO)

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value, less cost to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell. Costs incurred after acquisition are generally expensed. If the fair value of the asset declines, an impairment loss is recorded.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the sum of the estimated fair values of tangible and identifiable assets acquired less the estimated fair value of the liabilities assumed related to the acquisition of American Bank Holdings, Inc. Core deposit intangibles represent the estimated fair value of long-term deposit relationships acquired in the same transaction. The core deposit intangible is being amortized over 10 years and the remaining amount of the core deposit intangible is periodically reviewed for reasonableness. Goodwill has an indefinite useful life and is evaluated for impairment annually or more frequently if events and circumstances indicate that the asset might be impaired.

Bank Owned Life Insurance

The Bank invests in bank owned life insurance (BOLI) as a source of funding for employee benefit expenses. BOLI involves the purchase of life insurance by the Company on a select group of officers and directors whereby it is the owner and beneficiary of the policies. This life insurance is carried at the cash surrender value of the underlying policies and is included in other assets. Income from the increase in the cash surrender value of the policies is included in non-interest income.

Repurchase Agreements and Other Short-Term Borrowings

The Bank routinely enters into repurchase agreements with customers. As part of the repurchase agreements, the Bank uses marketable investment securities from its investment portfolio as collateral for the customer agreements. The repurchase agreements bear interest at a market rate.

The Bank maintains Fed Funds facilities with six other financial institutions in the amount of \$63.0 million. There were no borrowings outstanding on these facilities at December 31, 2017 and 2016.

Deferred Rent

Deferred rent is recorded and amortized to the extent the total minimum rental payments allocated to the current period on a straight-line basis exceed or are less than the cash payments required.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Comprehensive Income

Comprehensive income is comprised of the net income and other comprehensive income (loss), which includes unrealized gains and losses on available-for-sale securities, which is the Bank's sole component of accumulated other comprehensive income (loss). There were no items reclassified out of accumulated other comprehensive income (loss) for the years ended December 31, 2017 and 2016.

Income Taxes

The Bank accounts for income taxes using the asset and liability approach, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying and tax bases of assets and liabilities. A valuation allowance is recorded if, based upon the evidence available, it is more likely than not that some portion or all of the net deferred tax assets will not be realized.

Recognition and measurement of tax positions is based on management's evaluation of relevant tax code and appropriate industry information about audit proceedings for comparable positions at other organizations.

The income tax returns of the Bank for 2014, 2015, and 2016 are subject to examination by income taxing authorities, generally for three years after they were filed.

The Bank determined that as of December 31, 2017 and 2016, it has no material uncertain tax positions and no interest or penalties have been accrued. The Bank has elected to recognize any estimated penalties and interest on its income tax liabilities as a component of its provision for income taxes.

Stock-based Payment

The Bank recognizes compensation expense for the grant-date fair value of stock options and other equity-based compensation. The Bank recognizes expense over the requisite service period, which is generally the vesting period. Stock awards are classified as either an equity award or a liability award, and this classification is dependent upon the method by which the stock-based payment is ultimately settled. Equity classified awards are valued as of the grant date using either an observable market price or a valuation methodology. Liability classified awards are valued at fair

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

value at each reporting date. All of the Bank's stock options and other equity-based compensation arrangements are classified as equity awards.

Fair Value Measurements

In general, fair values of financial instruments are based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Bank's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. Fair value measurements are further discussed in Note 17.

Risks and Uncertainties

In the normal course of its business, the Bank encounters two significant types of risk: economic and regulatory. There are three main components of economic risk: interest rate risk, credit risk and market risk. The Bank is subject to interest rate risk to the degree that its interest-bearing liabilities mature or re-price at different speeds, or on different bases, than its interest-earning assets. Credit risk is the risk of default on the Bank's loan and investment portfolios that result from the borrowers' or issuer's inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of collateral underlying loans and investments.

The Bank is subject to the regulations of various government agencies. These regulations can and do change significantly from period to period. The Bank will also undergo periodic examinations by the regulatory agencies, which may subject it to further changes with respect to asset valuations, amounts of required loss allowances and operating restrictions resulting from the regulators' judgments based on information available to them at the time of their examinations.

New Accounting Standards

In February 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2018-02, Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Accumulated Other Comprehensive Income. This update requires a reclassification from accumulated other comprehensive income ("AOCI") to retained earnings for stranded tax effects resulting from the newly enacted federal corporate income tax rate in the Tax Reform Act, which was enacted on December 22, 2017. The Tax Reform Act included a reduction to the corporate income tax rate from 34 percent to 21 percent effective January 1, 2018. The amount of the reclassification is the difference between the historical corporate income tax rate and the newly enacted 21 percent corporate income tax rate, which resulted in an increase of \$74 thousand. The amendments in the ASU are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted and the Bank adopted the standard in 2017.

In August 2017, The Financial Accounting Standards Board ("FASB") issued ("ASU") 2017-12, *Derivatives and Hedging Accounting Standards Update*. The amendments in the Update improve the financial reporting of hedging relationships to better portray the economic results of an entity's risk management activities in its financial statements. This update will be effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020. The adoption of this guidance is not expected to have a material effect on the consolidated financial statements.

In March 2017, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2017-08 Receivables-Nonrefundable Fees and other Costs. The Update shortens the amortization period for certain callable debt securities held at a premium. This update will be effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020. The adoption of this guidance is not expected to have a material effect on the consolidated financial statements.

In December 2016, the FASB issued ASU 2016-19, *Technical Corrections and Improvements*. The amendments in this ASU cover a wide range of Topics in the Codification and represent changes to make corrections or improvements to the Codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. This update will be effective for fiscal years beginning after December 15, 2016, including all interim periods within those fiscal years. Early application is permitted. The adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash (a consensus of the FASB Emerging Issues Task Force).* The new guidance clarifies the classification within the statement of cash flows for certain transactions, including debt extinguishment costs, zero-coupon debt, contingent consideration related to business combinations, insurance proceeds, equity method distributions and beneficial interests in securitizations. The guidance also clarifies that cash flows with aspects of multiple classes of cash flows or that cannot be separated by source or use should be classified based on the activity that is likely to be the predominant source or use of cash flows for the item. This guidance is effective for fiscal years beginning after December 15, 2018 and interim periods within fiscal years beginning after December 15, 2019. The adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

In October 2016, the FASB issued ASU 2016-17, Consolidation (Topic 810): Interests Held through Related Parties That Are under Common Control. The new guidance changes the accounting for the consolidation of VIEs in certain situations involving entities under common control. Specifically, the amendments change how the indirect interests held through related parties that are under common control should be included in a reporting entity's evaluation of whether it is a primary beneficiary of a VIE. Under the amended guidance, the reporting entity is only required to include the indirect interests held through related parties that are under common control in a VIE on a proportionate basis. Currently, the indirect interests held by the related parties that are under common control are considered to be the equivalent of direct interests in their entirety. This guidance is effective for fiscal years beginning after December 15, 2016 and interim periods within fiscal years beginning after December 15, 2017. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In October 2016, the FASB issued ASU 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory.* This new guidance requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. Current U.S. GAAP prohibits the recognition of current and deferred income taxes for an intra-entity asset transfer until the asset has been sold to an outside party. This guidance is effective for fiscal years beginning after December 15, 2018 and interim reporting periods within annual periods beginning after December 15, 2019. The adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments.* This new guidance clarifies the guidance for classification of certain cash receipts and payments within an entity's statements of cash flows. These items include debt prepayment or extinguishment costs, settlement of zero-coupon debt instruments, contingent consideration payments made after a business combination, proceeds from the settlement of insurance claims, proceeds from the settlement of BOLI policies, distributions received from equity method investees, and beneficial interests in securitization transactions. The amended guidance also specifies how to address classification of cash receipts and payments that have aspects of more than one class of cash flows. This guidance is effective for fiscal years beginning after December 15, 2018 and interim periods within fiscal years beginning after December 15, 2019. The adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The new guidance replaces the incurred loss impairment methodology in current GAAP with an expected credit loss methodology and requires consideration of a broader range of information to determine credit loss estimates. Financial assets measured at amortized cost will be presented at the net amount expected to be collected by using an allowance for credit losses. Purchased credit impaired loans will receive an allowance account at the acquisition date that represents a component of the purchase price allocation. Credit losses relating to available-for-sale debt securities will be recorded through an allowance for credit losses, with such allowance limited to the amount by which fair value is below amortized cost. The guidance is effective for fiscal years beginning after December 15, 2020 and interim periods within those fiscal years. The Company's management team are in the process of developing an understanding of this pronouncement, evaluating the impact of this pronouncement and researching additional software resources that could assist with the implementation.

In March 2016, the FASB issued ASU 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The new guidance eliminates the concept of APIC pools for stock-based awards and requires that the related excess tax benefits and tax deficiencies be classified as an operating activity in the statement of cash flows. The new guidance

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

also allows entities to make a one-time policy election to account for forfeitures when they occur, instead of accruing compensation cost based on the number of awards expected to vest. Additionally, the new guidance changes the requirement for an award to qualify for equity classification by permitting tax withholding up to the maximum statutory tax rate instead of the minimum statutory tax rate. The new guidance is effective for annual periods beginning after December 15, 2017 and interim periods within annual periods beginning after December 15, 2018. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2016-02 Leases. From the lessee's perspective, the new standard establishes a right-of-use (ROU) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement for the lessee. From the lessor's perspective, the new standard requires a lessor to classify leases as either sales-type, finance or operating. lease will be treated as a sale if it transfers all of the risks and rewards, as well as control of the underlying asset, to the lessee. If risks and rewards are conveyed without the transfer of control, the lease is treated as a financing lease. If the lessor doesn't convey risks and rewards or control, an operating lease results. The ASU is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparable period presented in the financial statements, with certain practical expedients available. A modified retrospective transition approach is required for lessors for sales-type, direct financing, and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. The Company is currently evaluating the impact this ASU will have on its consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01 Financial Instruments-Overall (Topic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities which amends the guidance on the classification and measurement of financial instruments. Some of the amendments in this ASU include the following: (1) requires equity investments (except those accounted for under the equity method

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value measured in net income; (2) simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; (3) requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; and (4) requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value, among others. The amendments of ASU 2016-01 are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company does not expect that ASU 2016-01 will have a material effect on the consolidated financial statements.

In September 2015, the FASB issued ASU 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments*. The new guidance requires that adjustments to provisional amounts identified during the measurement period of a business combination be recognized in the reporting period in which the adjustment amounts are determined. Furthermore, the income statement effects of such adjustments, if any, must be calculated as if the accounting had been completed at the acquisition date reflecting the portion of the amount recorded in current-period earnings that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. Under previous guidance, adjustments to provisional amounts identified during the measurement period are to be recognized retrospectively. The guidance is effective for fiscal years beginning after December 15, 2016 and interim periods within fiscal years beginning after December 15, 2017. The adoption of this guidance is not expected to have a material effect on the consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which will supersede nearly all existing revenue recognition guidance under U.S. GAAP. The core principal of this ASU is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

assets recognized from costs incurred to obtain or fulfill a contract. This ASU will be effective for annual reporting periods beginning after December 15, 2018 and interim periods within annual reporting periods after December 15, 2019. Early adoption is permitted for an annual period beginning after December 15, 2016 and interim periods within that reporting period, for an annual reporting beginning after December 15, 2017, and interim period within annual periods beginning after December 15, 2017 or for an annual reporting period beginning after December 15, 2017, including interim periods within that reporting period. The ASU allows for either full retrospective or modified retrospective adoption. In August 2015, the FASB issued ASU 2015-14. Revenue from Contracts with Customers, which deferred the effective date of the new revenue recognition standard by one year. The Company is evaluating the transition method that will be elected and the potential effects of the adoption of this ASU on our financial statements. December 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-20, Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers. The amendments in this ASU cover a variety of Topics in the Codification related to the new revenue recognition standard and represent changes to make minor corrections or minor improvements to the Codification that are not expected to have a significant impact on current accounting practice or create a significant administrative cost to most entities. This update will be effective for fiscal years beginning after December 15, 2018, including all interim periods within those fiscal years. The adoption of this guidance is not expected to have a material effect on the consolidated financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the consolidated financial statements.

Note 2 - Merger

On January 1, 2016, Bancshares completed its acquisition of American Bank Holdings, Inc. (American). At closing, American and its wholly-owned subsidiary, American Bank, were merged with and into Bancshares and the Bank. Prior to the merger, certain American assets were spun-off, via a dividend, to a newly formed entity, the owners of which are the shareholders of American. American,

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

headquartered in Bethesda, MD had approximately \$318.9 million of assets, \$50.3 million of shareholders' equity, five banking offices in the Washington, DC area, and a national mortgage lending platform with eight residential mortgage origination offices as of December 31, 2015. The shareholders of American exchanged their outstanding shares of American for shares of common stock of Bancshares pursuant to an exchange ratio in which American shareholders received 2,375 shares of Bancshares common stock in exchange for one share of American. The merger was accounted for under the acquisition accounting method whereby the assets and liabilities of American were recorded at their estimated fair values as of the merger date.

The following table shows the consideration paid for American common equity and the amounts of acquired identifiable assets and liabilities assumed as of the acquisition date.

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

Purchase price	
Value of common shares issued (4,419,875 shares)	\$ 36,333,520
Fair value of stock options assumed	 615,067
Total purchase price	\$ 36,948,587
Identifiable assets	
Cash and due from banks	\$ 124,339,533
Interest bearing deposits in other banks	145,623
Investment securities	3,456,738
FHLB Stock	356,000
Loans held for sale	64,241,179
Loans receivable	99,732,146
Deferred tax asset	(26,590)
Bank premises and equipment	654,841
Accrued interest receivable	608,311
Cash surrender value life insurance	7,485,615
Core deposit intangible	1,490,840
Other assets	 2,733,595
Total identifiable assets	\$ 305,217,831
Identitfiable liabilities	
Non-interest bearing deposits	\$ 53,188,304
Interest bearing accounts	212,024,183
Junior subordinated obligations	2,793,000
Other liabilities	 4,456,695
Total identifiable liabilities	\$ 272,462,182
Net assets acquired including identifiable assets	\$ 32,755,649
Resulting goodwill	\$ 4,192,938

In many cases, determining the fair value of the acquired assets and assumed liabilities the Company estimates cash flows expected to result from those assets and liabilities and discounts those cash flows at appropriate rates of interest. The most significant of these determinations related to the valuation of purchase credit impaired. The following is a summary of the purchase credit impaired loans acquired in the American Merger:

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

	P	Purchased Credit		
	Impaired			
	Loans			
Contractually required principal and interest at acquisition	\$	4,924,518		
Contractual cash flows not expected to be collected		(1,418,072)		
Expected cash flows at acquisition	\$	3,506,446		
Interest components of expected cash flows		(354,314)		
Basis in purchased loans at acquisition - estimated fair value	\$	3,152,132		

In connection with the American merger, the Company incurred acquisition related expenses. These expenses were primarily related to professional services, systems conversions and integration of operations, termination of existing contractual arrangements to purchase various services, initial marketing and promotion expenses designed to introduce the Bank to former American Bank customers, and other costs of completing the transaction. For the year ending December 31, 2016, there was \$2,834,726 acquisition related costs incurred.

Note 3 - Cash and Due from Banks

Regulation D of the Federal Reserve Act requires the Bank to maintain reserve balances with the Federal Reserve Bank based principally on the type and amount of the Bank's deposits. Balances maintained are included in cash and due from banks. At December 31, 2017 and 2016, the required reserve balance was \$13,897,000 and \$12,798,000, respectively.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

During 2017 and 2016, there were no sales of investments.

At December 31, 2017, securities with a carrying value of \$20,025,269 were pledged to secure repurchase agreements, Federal Home Loan Bank advances and for other purposes required or permitted by law.

Information pertaining to securities available for sale with gross unrealized losses at December 31, 2017 and 2016 aggregated by investment category and length of time that individual securities have been in a continuous loss position, follows:

		2017											
		Less than 12 months				12 months or more				Total

Management has evaluated these securities for other than temporary impairment. Consideration was given to the length of time and the extent to which the fair value had been less than cost, and the financial condition and near-term prospects of the issuer, and the intent of the Bank to retain its investment in the issuer for a period of time sufficient to allow for any anticipatory recovery in fair value. These unrealized losses relate principally to interest rate market conditions and are not indicative of credit-related matters, such as the issuers' ability to repay the obligations. The Bank has the intent and ability to hold these available-for-sale securities for a period of time sufficient to allow for any anticipated recovery. Because the decline in fair value is attributable to changes in interest rates and illiquidity, and not credit quality, and because the Bank does not have the intent to sell these securities and it is likely that

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

it will not be required to sell the securities before their anticipated recovery, the Bank does not consider these securities to be other-than-temporarily impaired at December 31, 2017 or 2016.

Note 5 - Loans Receivable

Loans receivable, net of unamortized loan fees and costs and net of the allowance for loan losses, at December 31, 2017 and 2016 are summarized by type as follows:

	2017	2016
Commercial real estate Construction-commercial and residential Commercial Residential real estate	\$ 77,376,929 38,153,965 413,274,444 121,235,939	\$ 86,234,116 24,791,787 343,219,491 104,398,426
Consumer installment	47,405,111	44,456,930
Total loans receivable	697,446,388	603,100,750
Net deferred fees and costs	(2,612,584)	(2,793,764)
Allowance for loan losses	(7,069,270)	(6,732,098)
Total loans receivable, net	687,764,534	593,574,888

The Bank manages its credit products and the respective exposure to loan losses by the following specific portfolio segments, which are levels at which the Bank develops and documents its systematic methodology to determine the allowance for loan losses.

Commercial Real Estate

Commercial real estate loans are primarily secured by various types of commercial real estate including office, retail, warehouse, industrial and other non-residential types of properties and are made to owners and/or occupiers of such property. The repayment of loans secured by income-producing properties is typically dependent

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

upon the successful operation of a business or real estate project and thus may be subject to adverse conditions in the commercial real estate market or in the general economy. Within this segment, loans are further bifurcated between loans secured by owner occupied properties and investment (non-owner occupied) properties, as loans secured by investment properties exhibit higher risk.

Construction-Commercial and Residential

These loans consist of single-family residential projects, multi-family properties and commercial projects and are generally considered to involve a higher degree of risk than long-term financing on improved, occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estate of the property's value at completion of construction and estimated costs of construction, as well as the property's ability to attract and retain tenants.

Commercial

These loans consist primarily of commercial and industrial loans for the financing of accounts receivable, property, plant and equipment, and other general corporate needs. Within this segment, there is further bifurcation to isolate health care loans which consist primarily of asset-based loans to skilled nursing and assisted living facilities and corporate loans which are typically cash flow loans (including leveraged loans) asset-based or lender finance loans. The market area for health care loans and corporate loans is national with geographic diversification. Of primary concern in commercial lending is the borrower's creditworthiness and ability to successfully generate cash flow from their business to service the debt.

Residential Real Estate

These loans are secured by residential real estate and are further bifurcated to isolate first lien mortgages, second mortgages and home equity lines of credit. Residential first lien mortgages are evaluated for adequacy of repayment sources at time of approval based upon measures including credit scores, debt-to income and collateral values. Second mortgages and home equity lines are typically secured by second mortgages on the borrower's primary residence and carry a higher level of risk which is mitigated by prudent loan to value requirements.

Consumer

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

These loans consist primarily of loans made to individuals for personal, family and household purposes purchased from technology enabled lenders. These loans are unsecured and therefore may entail greater risk than certain other types of loans.

The following presents by class of loan, information related to non-accrual loans as of the years ended December 31:

Credit Quality Indicators

The Bank uses several credit quality indicators to manage credit risk in an ongoing manner. The Bank's primary credit quality indicators are to use an internal credit risk rating system that categorizes loans into pass, watch, special mention or classified categories. Credit risk ratings are applied individually to those classes of loans that have significant or unique credit characteristics that benefit from a case-by-case evaluation. These are typically loans to businesses or individuals in the classes which comprise the commercial portfolio segment. Groups of loans that are underwritten and structured using standardized criteria and characteristics, such as statistical models (e.g., credit scoring or payment performance), are typically risk rated and monitored collectively. These are typically loans to individuals in the classes which comprise the consumer portfolio segment.

The following are the definitions of the Bank's credit quality indicators:

Pass

Loans in all classes that comprise the commercial and consumer portfolio segments that are not adversely rated, are contractually current as to principal and interest, and are otherwise in compliance with the contractual terms of the loan agreement. Management believes that there is a low likelihood of loss related to those loans that are considered pass.

Pass/Watch

This category applies to extensions of credit, which though considered satisfactory and performing to terms, exhibit special risk features, technical weakness, weak financial reporting or a high sensitivity to industry or economic conditions. Credits may demonstrate clear progress and trends, which have been corrected and/or are in the process of being corrected. Cash flow coverage

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

margins are adequate but subject to significant fluctuations, which may limit debt service ability.

Commercial borrowers exhibit high levels of leverage and inconsistent earnings capacity. Management is considered marginally adequate. Financial information may only be marginally adequate and limited by virtue of timeliness or consistent reliability. Included in this category are loans to start-up ventures and small companies where repayment may be dependent on projections, other liquid collateral or a financially responsible guarantor, that may require an inherently higher degree of servicing or account officer attention.

Individuals may exhibit adequate income/cash-flow and liquidity; however, their financial positions may be limited in nature or susceptibility to adverse effect on economic conditions.

Real estate borrowers may exhibit adequate cash-flow and ability to repay, yet declining economic conditions warrant more than normal monitoring. Projects will have no pre-leasing or sales activity and may be considered speculative in nature. Property cash-flow is marginal with demonstrated prospects for improvement.

Special Mention

Assets in the special mention category are currently protected but potentially weak. These assets constitute an undue and unwarranted credit risk but not to the point of justifying a substandard classification. The credit risk may be relatively minor yet constitute an unwarranted risk in light of the circumstances surrounding a specific asset. A special mention rating should not be used simply as a compromise between a pass grade and substandard. Special mention assets have potential weaknesses which may, if not corrected, weaken the asset or inadequately protect the Bank's credit position at some future date. Assets, which might be detailed in this category, include credits that the lending officer may be unable to supervise properly because of lack of expertise, an inadequate loan agreement, the condition or control over collateral, failure to obtain proper documentation or any other deviations from prudent lending practices. An adverse trend in the borrower's operations or an imbalanced position in the balance sheet, which has not yet reached a point where liquidation is jeopardized, may best be handled in this category. Economic, industry or market

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

conditions, which may adversely affect the asset in the future, should be considered.

Substandard

A substandard asset is inadequately protected by the current sound worth and paying capacity of the borrower or the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, which existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified substandard.

Doubtful

Loans in this category have all the weaknesses inherent in one classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors which may work to the advantage and strengthening of the loan, its classification as an estimated loss is deferred until its more exact status may be determined.

An asset classified doubtful has all the weakness inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonable specific pending factors which work to the advantage and strengthen the asset, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral and refinancing plans.

Loss

Loans classified as loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

though partial recovery may be affected in the future. As a practical matter, the Bank will not carry this rating on its reports, as it is the Bank's policy to immediately charge these accounts off in the period they are deemed uncollectible.

The Bank's credit quality indicators are periodically updated on a case-by-case basis. The following table presents by class and by credit quality indicator, the recorded investment in the Bank's loans and leases as of December 31, 2017 and 2016:

December 31, 2017	Pass	Pass/Watch	Special mention	Substandard	Doubtful	Loss	Total

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

The restructuring of a loan is considered a troubled debt restructuring (TDR) if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, principal forgiveness, restructuring amortization schedules and other actions intended to minimize potential losses. At December 31, 2017 and December 31, 2016, the Bank had no specific reserve allocations for TDR's.

Loans considered to be TDR loans totaled \$2,281,975 and \$2,345,775 as of December 31, 2017 and December 31, 2016, respectively. TDR loans also on nonaccrual as of December 31, 2017 and 2016 were \$2,104,517 and \$926,055, respectively.

The following table presents details related to loans identified as TDR's during the year ended December 31, 2017 and 2016:

		Decem	ber 31, 2017			
		Pre-	modification	Pos	t-modification	
	Number of Outstanding			Outstanding		
	Contracts	I	nvestment]	Investment	
Commercial	1	\$	793,488	\$	793,488	
Commercial real estate	1		459,909		521,030	
Residential real estate	3		439,883		441,565	
	5	\$	1,693,280	\$	1,756,083	

The pre-modification and post-modification balances represent the balances outstanding immediately before and after modification of the loan, Two loans were granted periods of interest only, one loan was extended and re-amortized over 30 years, one loan had its interest rate changed from variable to fixed and one loan was provided concession through court ordered restructuring.

Total deposits	\$ 820,351,588	\$ 4,334,113	\$ 681,235,278	\$ 3,466,855

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

At December 31, 2017, the scheduled maturities of time deposits are as follows:

2018	\$ 156,404,179
2019	41,128,859
2020	2,141,846
2021	1,820,945
2022	4,880,287
Total	\$ 206,376,116

Certificates of deposit, with balances that meet or exceed the FDIC insurance limit at the balance sheet date totaled \$40,405,549 and \$28,550,579 at December 31, 2017 and 2016, respectively.

Interest paid on certificates of deposit in excess of the FDIC insurance limit was approximately \$363,576 and \$290,185 during the years ended December 31, 2017 and 2016, respectively.

Deposits from related parties held by the Bank at December 31, 2017 and 2016 amounted to \$75,664,640 and \$50,665,240, respectively.

Note 9 – Other Borrowed Funds

As of December 31, 2017, the Bank has a credit line with the Federal Home Loan Bank of Atlanta. In order to borrow under the agreement the Bank secures the borrowings with loans. Under the terms of this agreement, the Bank is required to maintain sufficient collateral to secure these borrowings. As of December 31, 2017, the Bank pledged eligible multi-family real estate loans with a book value of \$2,985,426, eligible 1-4 family first mortgages with a book value of \$1,133,061, eligible home equity loans with a book value of \$2,880,810 and investment securities with a carrying value of \$14,199,393, to facilitate current and future transactions. The total collateral value assigned by the Federal Home Loan Bank for these pledged loans and investments was \$18,484,507.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

The contractual maturities of the current long term FHLB advances are as follows:

_	Funded	Maturity date	Interest rate	_	2017	2016

Fixed rate advance	April 11, 2017	April 11, 2022	2.14%		5,000,000	
				\$	7,000,000	\$ 22,000,000

In 2016, Bancshares issued Fixed Rate Subordinated Notes of \$17,000,000. The Notes are unsecured, mature on December 30, 2026 and pay interest at 7% semi-annually. Bancshares may redeem the Notes at its option. The proceeds of the Notes will be used to fund the Bank's organic growth, potential acquisitions, and general corporate purposes.

In 2016, Bancshares issued Fixed to Floating Rate Subordinated Notes of \$7,000,000. The Notes are unsecured mature on December 30, 2026 and pay interest semi-annually. The initial rate on the Notes was 6.5%. The interest rate shall reset quarterly to an interest rate per annum equal to the three-month LIBOR plus 4.695%. If the three-month LIBOR is less than zero, the three-month LIBOR shall be deemed to be zero. Bancshares may redeem the Notes at its option. The proceeds of the Notes will be used to fund the Bank's organic growth, potential acquisitions, and general corporate purposes.

In 2017 and 2016, Bancshares incurred issuance costs of \$20,000 and \$589,426, respectively for the Fixed Rate and Fixed to Floating Rate Subordinated Notes. The issuance costs are netted against the Subordinated Notes on the accompanying Balance Sheet. The accumulated expense as of December 31, 2017 and 2016 was \$63,407 and \$2,456 respectively. The incurred issuance costs are being expensed over the life of the Notes of 10 years.

On April 22, 2003, American Bank Holdings Inc. (acquired by Bancshares on January 1, 2016), formed a wholly owned subsidiary, American Bank Holdings Statutory Trust I, for the purpose of participating in a trust preferred pooled offering to issue trust preferred securities which have a 30-year term, with no principal amortization and a 5-year call option and are guaranteed by the Company. The balance of the junior subordinated obligations was \$2,827,783 and \$2,793,000 as of

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

December 31, 2017 and December 31, 2016, respectively. The subsidiary is not being consolidated in these financial statements in accordance with accounting guidance. The subsidiary's financial statements are not presented separately because they are not material. The trust issuer is a 100% owned finance subsidiary of the Company and the Company has fully and unconditionally guaranteed the securities. These securities pay interest at the rate of 3 month LIBOR plus 3.3% (4.66 % and 4.18% at December 31, 2017 and 2016, respectively) with a 12.5% interest rate cap for the first 5 years and adjust on a quarterly basis. The initial rate of these securities was 4.62%. The net proceeds from the Trust were used for general corporate purposes.

In 2013, American Bank Holdings, Inc. elected to defer the scheduled quarterly interest payments due on the securities beginning with the April 7, 2013 payment. This deferral was mandated by American Bank Holdings, Inc.'s regulators. Interest was accrued on the deferred amounts at the same rate as the securities. The deferred amount was paid in full in July 2016.

December 31, 2017 and 2016

Note 10 - Income Taxes

As a result of the Tax Cuts and Jobs Act enacted on December 22, 2017, deferred taxes as of December 31, 2017 are based on the newly enacted U.S. statutory federal income tax rate of 21%. Deferred taxes as of December 31, 2016 are based on the previously enacted U.S. statutory federal income tax rate of 34%. The components of net deferred tax assets and liabilities as of December 31, 2017 and 2016 are as follows:

	2017		2016	
Deferred tax assets:			-	
Loan loss reserves	\$	1,693,236	\$	2,365,311
Unrealized losses on investment portfolio		149,471		282,649
Net operating losses and tax credit carryforwards		233,939		153,330
Deferred rent		177,284		318,994

Less valuation allowance		(233,939)		(153,330)
Net deferred tax assets		3,411,731		5,391,230
Deferred tax liability:				
Depreciation and amortization		(231,605)		(151,834)
Total deferred tax liabilities		(231,605)		(151,834)
Deferred tax asset, net	\$	3,180,126	\$	5,239,396

As a result of the enactment of the Tax Reform Act on December 22, 2017, the Company remeasured its net deferred tax asset based upon the newly enacted U.S. statutory federal income tax rate of 21%, which is the tax rate at which this asset is expected to reverse in the future. Notwithstanding the foregoing, the Company is still

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

analyzing certain aspects of the new law and refining its calculations, which could affect the measurement of these assets and liabilities or give rise to new deferred tax amounts. Nonetheless, the Company recognized an income tax charge of \$1.5 million in 2017. The reconciliation of the income tax benefit computed based on statutory rates and income tax expense for the years ended December 31, 2017 and 2016 are as follows:

	 2017	 2016
Federal income tax at the statutory rate State income tax, net of federal effect	\$ 5,934,007 849,457	\$ 5,567,499 890,520
Permanent M-1's-federal Provisional deferred tax adjustment related to	47,317	131,062
reduction in U.S. federal statutory income tax rate	1,479,160	-
Other Change in valuation allowance	129,958 80,609	(57,337) 30,200
	\$ 8,520,508	\$ 6,561,944

Provision for income taxes for the years ended December 31, 2017 and 2016 consist of the following:

	2017	2016
Current income taxes		
Federal	\$ 5,548,320	\$ 7,105,332
State	1,046,096	1,800,640

	1,926,092	(2,344,028)
Total provision for income taxes	\$ 8,520,508	\$ 6,561,944

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

Note 11 - Related Party Transactions

The Bank has banking transactions in the ordinary course of business with related parties, including directors, executive officers and their associates, on the same terms as those prevailing at the same time for comparable transactions with unrelated persons, and that did not involve more than a normal risk of collection or present other unfavorable features.

In the ordinary course of business, the Bank has granted loans to principal officers and directors and their affiliates. The aggregate amount of such loans outstanding at December 31, 2017 and 2016 was \$5,440,506 and \$9,238,240, respectively. During 2017, new loans and line of credit advances to such related parties amount to \$243,000 in the aggregate and payments amounted to \$4,040,734 in the aggregate.

Note 12 - Employee Benefit Plans

The Bank has a 401(k) defined contribution plan covering substantially all full-time employees and provides that an employee becomes eligible to participate immediately on employment provided they are 21 years of age or older. However, new employees will actually enter the plan once they reach the entry date which is defined as the first day of the plan quarter coinciding with or next following the date the participant satisfied the plan's eligibility requirement. Under the plan, a participant may elect to contribute a percentage of his or her compensation to the extent that is permitted by law. In 2017 and 2016, the Bank matched 50% of employee contributions up to 6% of the employee's base salary. Matching contributions totaled \$592,642 and \$546,286 for the years ended December 31, 2017 and 2016, respectively. The Bank may also make, but is not required to make, discretionary contributions for each participant. The amount of contribution, if any, is determined on an annual basis by the Board of Directors. No discretionary contributions were made by the Bank during the years ended December 31, 2017 and 2016.

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

Note 13 - Stockholders' Equity

Share-based Awards

On July 25, 2006, the Congressional Bancshares, Inc. 2006 Stock Incentive Plan (the Plan) was adopted. This Plan was replaced by the Congressional Bancshares, Inc. 2014 Stock Incentive Plan which was adopted on June 25, 2014. The Plan permits the granting of share-based awards to its employees for up to 600,000 shares of common stock. Bancshares believes that such awards better align the interests of its employees with those of its shareholders.

Restricted Stock Awards

As part of executive compensation, the Bank has awarded 154,000 restricted shares as of December 31, 2017. The vesting terms have ranged from three to eight years. In 2017 and 2016, 46,000 shares and 6,000 shares were awarded, respectively, and during these same time periods, 25,000 shares and 15,000 shares vested, with an associated compensation expense of \$191,460 and \$102,030.

The Bank has unvested restricted stock award grants of 63,000 shares from the Plan at December 31, 2017. Unrecognized stock-based compensation expense related to restricted stock awards totaled \$497,040 at December 31, 2017. At such date the weighted average period over which this unrecognized expense was expected to be recognized was less than 3 years.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

The following table summarizes the unvested restricted stock awards at December 31. 2017:

		Weighted-Average		
		Grant Date		
_	Shares	Fai	r Value	
Balance at Janaury 1, 2016	51,000	\$	6.72	
Issued	6,000		8.36	
Forfeited	-		-	
Vested	(15,000)		6.80	
Balance at December 31, 2016	42,000	\$	6.93	
Issued	46,000		8.64	
Forfeited	-		-	
Vested	(25,000)		7.66	
Balance at December 31, 2017	63,000	\$	7.89	

Stock Options

Option awards are generally granted with an exercise price equal to the market price of the Bancshares stock at the date of grant; those option awards generally vest based on 5 years of continuous service and have 10-year contractual terms. Share awards generally vest over five years. Certain option and share awards provide for accelerated vesting if there is a change in control (as defined in the Plan).

The compensation cost that has been charged against operations for options issued under the Plan totaled \$110,488 and \$97,893 for 2017 and 2016, respectively.

The fair values of the options granted during 2017 and 2016 using the Black-Scholes option-pricing model based on the following weighted average assumptions:

	2017	2016
Weighted-average volatility	25%	23%-24%
Expected dividends	-	-
Expected term (in years)	5.00	5.00-6.00
Risk-free rate	1.74-1.94%	1.38-1.61%

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Since an active market for the Bank's common stock does not exist, the expected volatility is based on the average annual historical volatility of common stock for comparable public banks in the banking industry. The estimated option life is derived from the "simplified method" formula. The risk free rate is based upon the U.S. Treasury note rate in effect at the time of grant. The expected dividend yield is based upon implied and historical dividend declarations.

The weighted average fair value of options granted during 2017 and 2016, respectively using these assumptions were \$2.32 and \$1.98, respectively.

A summary of the options granted are presented below for the years ended December 31, 2017 and 2016, and changes during the years then ended are presented below:

<u>Options</u>	Shares	averag	ighted- e exercise orice	Weighted- average remaining contractual term
Outstanding at January 1, 2016 Granted	374,713 12,000	\$	6.72 8.08	5.19
Exercised	-		-	
Forfeited or expired	(8,575)		6.69	
Outstanding at December 31, 2016	378,138		6.76	4.39
Granted	57,000		9.02	
Exercised Exercised	(5,000)		2.80	
Forfeited or expired	(5,000)		3.80	
Outstanding at December 31, 2017	430,138	\$	7.09	4.20
Exercisable at December 31, 2017	387,286	\$	6.88	3.64

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

A summary of the status of the Bank's non-vested stock options as of December 31, 2017 and 2016 and changes during the years then ended are presented below:

		We	ighted-
		average grant-	
Nonvested stock options	Shares	date f	fair value
Balance at January 1, 2016	72,548	\$	2.24
Granted	12,000		1.98
Vested	(63,680)		2.19
Forfeited	-		
Balance at December 31, 2016	20,868		2.24
Granted	57,000		2.32
Vested	(35,016)		2.27
Forfeited			
Balance at December 31, 2017	42,852	\$	2.32

As of December 31, 2017, there was \$99,329 of total unrecognized compensation cost related to non-vested stock options granted under the Plan. That cost is expected to be recognized fully in 2018 and 2019. The total fair value of stock options vested during the years ended December 31, 2017 and 2016 were \$95,000 and \$98,000, respectively.

Note 14 - Commitments and Contingencies

The Bank entered into an employment agreement with its president effective May 21, 2012. In the event the president is terminated on or before the second anniversary of the date a change of control occurs, as set forth in his employment agreement, he will be entitled to a severance payment as defined in the employment agreement.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

The Bank is involved in various legal actions arising in the ordinary course of business. In the opinion of management and counsel, the outcome of these matters will not have a significant adverse effect on the consolidated financial statements.

Note 15 - Financial Instruments with Off-Balance Sheet Risk

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of amounts recorded in the balance sheet. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained is based on management's credit evaluation of the customer. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the commitment contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Generally, commitments to extend credit are subject to annual renewal. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to extend credit to existing and new borrowers approximated \$141.6 million at December 31, 2017, which includes approximately \$99.5 million with commitment maturities beyond one year.

Note 16 - Regulatory Matters

Banks and bank holding companies are subject to various regulatory capital requirements administered by state and federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weighting and other factors.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

The Basel III Capital Rules, a new comprehensive capital framework for U.S. banking organizations, became effective for Bancshares and the Bank on January 1, 2015 (subject to a phase-in period for certain provisions). Quantitative measures established by the Basel III Capital Rules to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the table below) of Common Equity Tier 1 capital, Tier 1 capital and Total capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital to adjusted quarterly average assets (as defined).

When fully phased in on January 1, 2019, the Basel III Capital Rules will require the Bank to maintain (i) a minimum ratio of Common Equity Tier 1 capital to risk-weighted assets of at least 4.5%, plus a 2.5% "capital conservation buffer" (which is added to the 4.5% Common Equity Tier 1 capital ratio as that buffer is phased in, effectively resulting in a minimum ratio of Common Equity Tier 1 capital to risk-weighted assets of at least 7.0% upon full implementation), (ii) a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, plus the capital conservation buffer (which is added to the 6.0% Tier 1 capital ratio as that buffer is phased in, effectively resulting in a minimum Tier 1 capital ratio of 8.5% upon full implementation), (iii) a minimum ratio of Total capital (that is, Tier 1 plus Tier 2) to risk-weighted assets of at least 8.0%, plus the capital conservation buffer (which is added to the 8.0% total capital ratio as that buffer is phased in, effectively resulting in a minimum total capital ratio of 10.5% upon full implementation) and (iv) a minimum leverage ratio of 4.0%, calculated as the ratio of Tier 1 capital to average quarterly assets.

The implementation of the capital conservation buffer began on January 1, 2016 at the 0.625% level and will be phased in over a four-year period (increasing by that amount on each subsequent January 1, until it reaches 2.5% on January 1, 2019). The Basel III Capital Rules also provide for a "countercyclical capital buffer" that is applicable to only certain covered institutions and does not have any current applicability to the Bank. The capital conservation buffer is designed to absorb losses during periods of economic stress and, as detailed above, effectively increases the minimum required risk-weighted capital ratios. Banking institutions with a ratio of Common Equity Tier 1 capital to risk-weighted assets below the effective minimum (4.5% plus the capital conservation buffer and, if applicable, the countercyclical capital buffer) will face constraints on dividends, equity repurchases and compensation based on the amount of the shortfall.

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

The Bank's actual capital amounts and ratios and selected minimum regulatory thresholds as of December 31, 2017 and 2016 are presented in the following table:

	Actual			For capital ade	• •	To be well capitalized under prompt corrective action provisions			
	Amount	Ratio		Amount	Ratio		Amount	Ratio	
As of December 31, 2017 Total Capital (to risk weighted assets)	\$ 113,600,525	14.68%	\$	61,923,200	8.00%	. \$	77,404,000	10.00%	
Tier 1 Capital (to risk weighted assets)	106,321,229	13.74%		46,442,400	6.00%		61,923,200	8.00%

Tier 1 Capital (to average assets)	95,861,696	11.59%		33,273,327	4.00%		41,591,659	5.00%	

Note 17 - Fair Value of Financial Instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact. The Bank uses valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, a fair value hierarchy for valuation inputs is utilized - that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

- Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Notes to Consolidated Financial Statements - Continued December 31, 2017 and 2016

 Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Bank's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Bank's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Bank's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

Financial assets measured at fair value on a recurring basis include securities available for sale, loans held for sale and interest rate lock commitments.

U.S. Treasury securities are reported at fair value utilizing Level 1 inputs. U.S. government agency securities. mortgage-backed securities, collateralized loan obligations and corporate bonds are reported at fair value using Level 2 inputs. For these securities, the Bank obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. Other securities are reported at fair value utilizing Level 3 inputs. Other securities are not traded and are subject to the redemption provisions of the issuers.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

The fair value of loans held for sale is determined using quoted secondary-market prices or investor commitments and are considered Level 2. If no such quoted price exists, the fair value of a loan is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan, which would be used by other market participants.

Interest rate lock commitments are recorded at fair value determined as the amount that would be required to settle each of these derivatives at the balance sheet date using Level 3 valuations which consider interest rate and terms, estimated pull-through rates and quoted investor prices less the costs to originate. The estimated pull-through rate used was approximately 83% if applications taken and expenses of approximately 1% of loans closed.

The following table summarizes financial assets measured at fair value on a recurring basis as of December 31, 2017, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

			Fair value measurements using								
			(Quoted price	es						
				in active markets for Significant

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Certain financial assets are measured at fair value on a nonrecurring basis; that is, not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). Financial assets measured at fair value on a non-recurring basis as of December 31, 2017 include the following:

			using						
			Quote	ed prices				_	
			in a	active					
			mark	ets for	Sign	ificant			
				ntical	ot	her	Significant		
			sets/	obse	observable				
			liab	ilities	inp	outs		inputs	
Description		Fair value	(Le	vel 1)	(Lev	vel 2)		(Level 3)	
Impaired loans	\$	11,073,775	\$	-	\$	=	\$	11,073,775	
Other real estate owned		145,000		-		-		145,000	

Financial assets measured at fair value on a non-recurring basis as of December 31, 2016 include the following:

				Fair v	alue mea	surements	using	
			Quote	d prices				
			in a	ctive				
			mark	ets for	Sign	ificant		
			ider	ntical	01	ther	S	Significant
	assets/				obse	ervable	un	observable
			liabi	ilities	inj	puts		inputs
Description		Fair value	(Lev	vel 1)	(Le	vel 2)		(Level 3)
Impaired loans	\$	11,965,634	\$	_	\$	_	\$	11,965,634
Other real estate owned		978,305		_		_		978,305

Impaired loans are reported at fair value using either the present value of expected cash flows, the loans observable market price, or the fair value of collateral less estimated selling costs if the loan is collateral dependent. Although appraisals are obtained on collateral dependent loans, the appraised values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation and/or management's expertise and knowledge of the borrower's business, therefore are classified as level 3. For impairment measured

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

based on a discounted cash flow methodology, the discount rate is based on an observable input however the determination of expected cash flows requires management judgement therefore is also conservatively classified as Level 3.

Foreclosed real estate assets have been valued using a market approach. The values were determined using market prices or similar real estate assets based on an independent appraisal. Refer to Note 1, summary of significant accounting policies – other real estate owned, for specific valuation details.

The Bank discloses the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The estimated fair value approximates carrying value for cash, due from banks and fed funds sold, accrued interest receivable, loans, deposits, short term borrowings and accrued interest receivable and other liabilities. The methodologies for other financial assets and financial liabilities are discussed below:

Cash and Temporary Investments

Cash and due from banks and federal funds sold. The carrying value is a reasonable estimate of fair value.

Investment Securities

For securities and marketable equity securities held for investment purposes, fair values are based on quoted market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. The market value of restricted stock approximates fair value based on the redemption provision of the issuer.

Loans

For variable rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for certain consumer mortgage loans and other consumer loans are based on quoted market prices for similar loans. Fair values for fixed rate commercial real estate, investment property mortgage loans, commercial and industrial was estimated by computing the

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

discounted value of estimated cash flows, adjusted for potential credit losses, for pools of loans having similar characteristics. The discount rate was based upon the current loan origination rate for similar loans. Nonperforming loans, if any, would have an assumed interest rate of 0%.

Loans Held for Sale

The fair value of mortgage loans held for sale is determined, when possible, using quoted secondary-market prices or investor commitments. If no such quoted price exists, the fair value of a loan is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan, which would be used by other market participants.

Interest Rate Lock Commitment

The fair value of interest rate lock commitments is determined as the amount that would be required to settle each of these derivatives at the balance sheet date using Level 3 valuations which consider interest rate and terms, estimated pull-through rates and quoted investor prices less the costs to originate loans.

Accrued Interest Receivable

The carrying amount approximates the fair value of accrued interest, considering the short-term nature of the receivable and its expected collection.

Deposits

The fair value of demand, money market savings and regular savings deposits, which have no stated maturity, were considered equal to their carrying amount, representing the amount payable on demand. While management believes that the Bank's core deposits provide a relatively stable, low-cost funding source that has a substantial intangible value separate form the value of the deposit balances, these estimated fair values do not include the intangible value of core deposit relationships, which comprise a significant portion of the Bank's deposit base. The fair value of time deposits was based upon the discounted value of contractual cash flows at current rates for deposits of similar remaining maturities.

Notes to Consolidated Financial Statements - Continued

December 31, 2017 and 2016

Borrowed Money

The carrying amount approximates the fair value of the repurchase agreements considering the one day maturity of the borrowings. The fair value of the Federal Home Loan Bank borrowed funds was based on contractual cash flows, upon their maturity or next re-price date and computing their discounted value. The carrying amount of junior subordinated debt is a reasonable estimate of fair value due to the adjustable rate feature of the instrument. The fair value of subordinated debt is determined to approximate carrying value. The notes were issued on December 15, 2016.

Accrued Interest Payable

The carrying amount approximates the fair value of accrued interest payable considering the short-term nature of the payable and expected payment.

The estimated fair values of the Company's financial instruments were as follows at December 31, 2017 and 2016:

	2017				 2016			
		Carrying		Estimated	Carrying		Estimated	
		amount		fair value	 amount		fair value	
Financial assets:

Congressional Bancshares, Inc. owns 100% of American Bank Holdings Statutory Trust I

Item 2b

Results: A list of branches for your depository institution: CONGRESSIONAL BANK (ID_RSSD: 3187630).

This depository institution is held by CONGRESSIONAL BANCSHARES, INC. (3391129) of BETHESDA, MD.

The data are as of 12/31/2017. Data reflects information that was received and processed through 01/04/2018.

Reconciliation and Verification Steps

- 1. In the Data Action column of each branch row, enter one or more of the actions specified below
- 2. If required, enter the date in the **Effective Date** column

Actions

OK: If the branch information is correct, enter 'OK' in the **Data Action** column.

Change: If the branch information is incorrect or incomplete, revise the data, enter 'Change' in the Data Action column and the date when this information first became valid in the Effective Date column.

Close: If a branch listed was sold or closed, enter 'Close' in the Data Action column and the sale or closure date in the Effective Date column.

Delete: If a branch listed was never owned by this depository institution, enter 'Delete' in the Data Action column.

Add: If a reportable branch is missing, insert a row, add the branch data, and enter 'Add' in the Data Action column and the opening or acquisition date in the Effective Date column.

If printing this list, you may need to adjust your page setup in MS Excel. Try using landscape orientation, page scaling, and/or legal sized paper.

Submission Procedure

When you are finished, send a saved copy to your FRB contact. See the detailed instructions on this site for more information.

If you are e-mailing this to your FRB contact, put your institution name, city and state in the subject line of the e-mail.

Note:

To satisfy the FR Y-10 reporting requirements, you must also submit FR Y-10 Domestic Branch Schedules for each branch with a Data Action of Change, Close, Delete, or Add.

The FR Y-10 report may be submitted in a hardcopy format or via the FR Y-10 Online application - https://y10online.federalreserve.gov.

* FDIC UNINUM, Office Number, and ID_RSSD columns are for reference only. Verification of these values is not required.
