An Update on Housing Market and Mortgage Performance in the Fifth District
2nd Quarter, 2013
Summary of Findings

This report analyzes the size, composition, and performance of prime and subprime home mortgages in the Fifth District. It also provides information on trends in the District's housing market and charts with state level data.

Fifth District Delinquency and Foreclosure Rates

- The percentage of mortgages in foreclosure in the Fifth District edged down 0.1 percentage point to 2.5 percent in the second quarter of 2013, 0.7 percentage point lower than the rate in the second quarter of 2012. (Table 1)
- The 90+ day delinquency rate fell to 2.6 percent in the second quarter of 2013, 0.3 percentage point below its level in the first quarter of 2013 and 0.2 percentage point lower than its level one year ago. (Table 2)
- The prime foreclosure rate in the Fifth District dropped from 1.7 percent to 1.5 percent in the second quarter of 2013. Over the year, it fell 0.8 percentage point. (Table 3)
- In the second quarter of 2013, the subprime mortgage foreclosure rate rose 0.5 percentage point to 9.3 percent. This rate was 1.4 percentage points higher than its level in the second quarter of 2012. (Table 5)
- Subprime mortgages make up approximately 9.3 percent of all loans in the Fifth District but 30.8 percent of all loans in foreclosure. (Table 4, Figure 2)

State Highlights

- Among Fifth District jurisdictions, Maryland had the highest foreclosure rate (4.2 percent). The Virginia foreclosure rate of 1.2 percent was the lowest in the District and one of the lowest in the nation. (Table 2)
- Similarly, Maryland had the highest prime foreclosure rate in the Fifth District (2.6 percent) and Virginia had the lowest prime foreclosure rate (0.7 percent). (Table 3)
- Maryland also had the highest subprime foreclosure rate in the District (14.5 percent) while Virginia posted the lowest subprime foreclosure rate (4.7 percent). (Table 5)
- Lastly, Maryland had the highest share of subprime mortgages (11.2 percent) in the Fifth District and Virginia had the lowest share (7.8 percent). (Table 4)

Fifth District Economic Conditions and Looking Forward

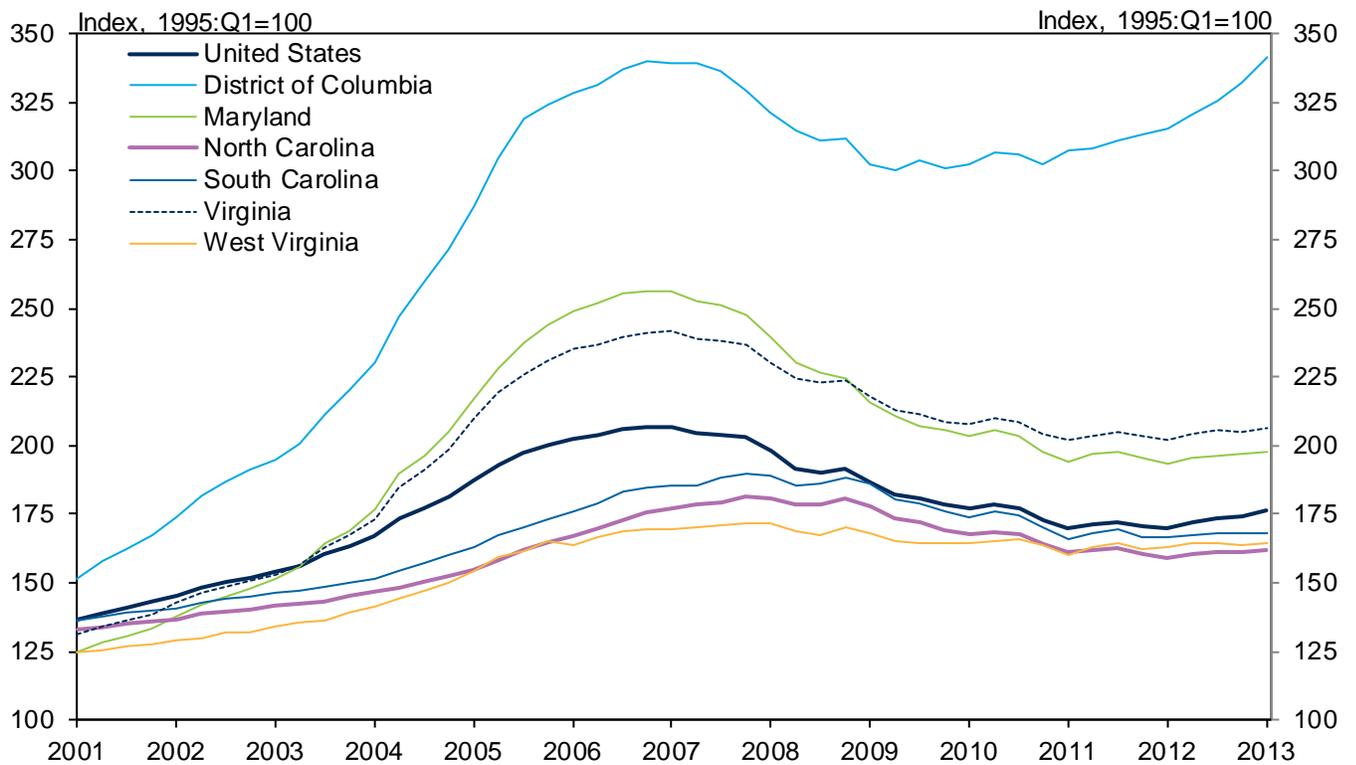

- Rising house prices can help to reduce the possibility of mortgage default. According to the Federal Housing and Finance Agency, Fifth District home values appreciated 0.5 percent in the second quarter of 2013 and 2.0 percent on a year-over-year basis.
- Lower rates of unemployment can also reduce the likelihood of mortgage delinquency since the loss of a job can affect a household's ability to repay. The unemployment rate (NSA) in the Fifth District declined from 8.1 percent in June 2012 to 7.7 percent in June 2013. (Table 7, Figure 10)
