**An Update on Housing Market and Mortgage Performance in Maryland and the District of  
Columbia  
3<sup>rd</sup> Quarter, 2013  
Summary of Findings**

This report analyzes the size, composition, and performance of prime and subprime home mortgages in Maryland and the District of Columbia. It also provides information on trends in the region's housing market and charts with metropolitan area and county level data.

**State Delinquency and Foreclosure Rates**

- In the third quarter of 2013, foreclosure rates in Maryland and the District of Columbia generally declined on a year-over-year basis. Furthermore, 90+ day delinquency rates also declined since the third quarter of 2012 in both Maryland and the District of Columbia.
- Since September 2012, Maryland's total foreclosure rate fell 1.1 percentage points to 3.3 percent while the 90+ day delinquency rate declined 0.4 percentage point to 3.3 percent. (Table 8)
- From September 2012 to September 2013, the total foreclosure rate in D.C. edged down from 2.3 percent to 2.2 percent while the 90+ day delinquency rate fell 0.7 percentage point to 2.6 percent over the same period. (Table 13)
- The prime foreclosure rate in Maryland decreased from 4.0 percent in September 2012 to 3.1 percent in September 2013. Over the same period, the prime 90+ day delinquency rate edged down from 3.4 percent to 3.1 percent. (Table 9)
- Since September 2012, D.C.'s prime foreclosure rate ticked up slightly from 2.0 percent to 2.1 percent and the 90+ day delinquency rate fell from 3.0 percent to 2.4 percent. (Table 15)
- Maryland's subprime foreclosure rate declined from 14.8 percent to 8.0 percent between September 2012 and September 2013. At the same time, the subprime 90+ day delinquency rate declined 3.1 percentage points to 8.5 percent. (Table 10)
- The subprime foreclosure rate in D.C. dropped 2.7 percentage points over the year ending September 2013 to 7.2 percent while the 90+ day delinquency rate declined 3.6 percentage points to 7.2 percent. (Table 17)
- Maryland and D.C. are ranked 13<sup>th</sup> and 35<sup>th</sup> in the nation, respectively, in their share of subprime loans. (Table 5)

**State Economic Conditions and Looking Forward**

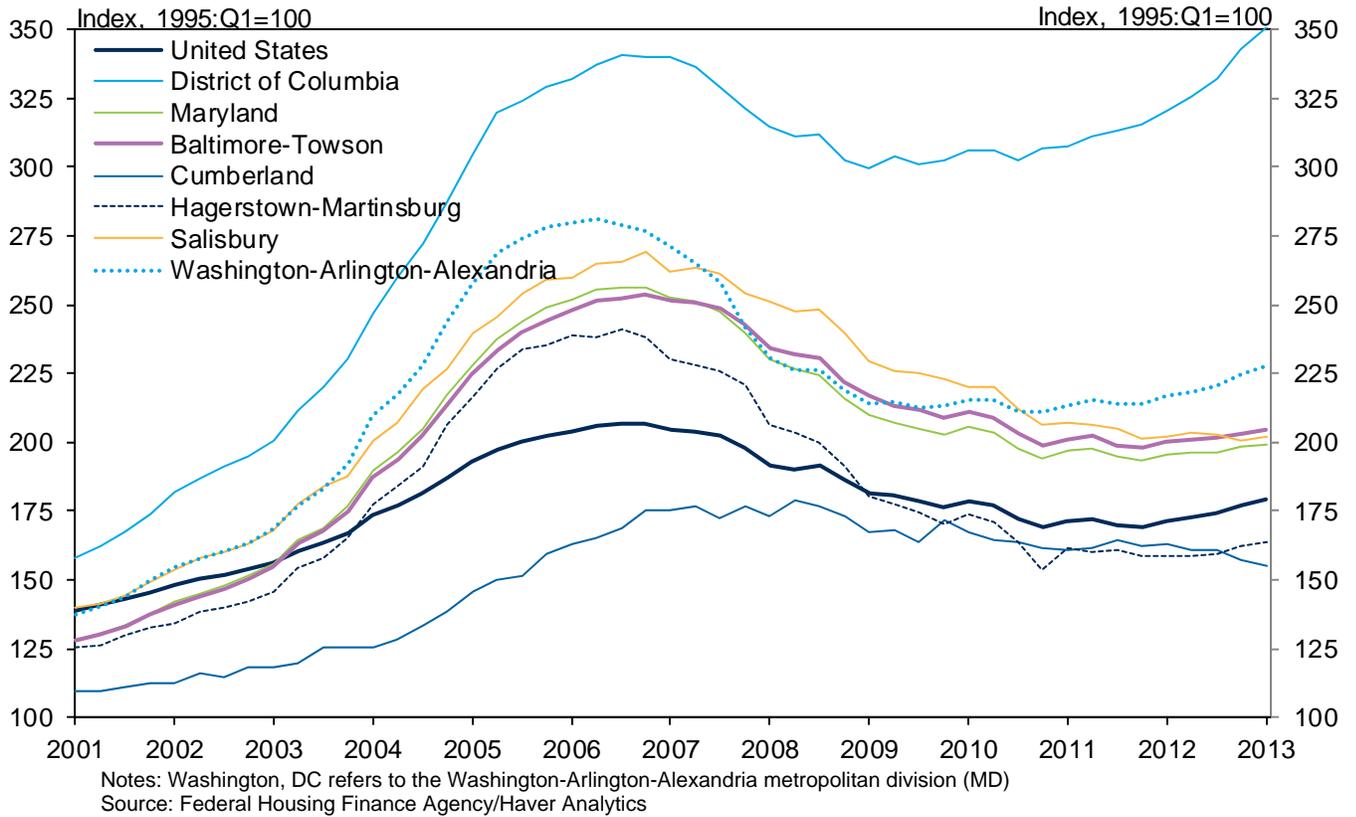

- Rising house prices can help to reduce the possibility of mortgage default. According to the Federal Housing Finance Agency, house prices in Maryland increased 0.3 percent in the third quarter of 2013 and 1.8 percent on a year-over-year basis. Meanwhile, home values in D.C. appreciated 2.3 percent in the third quarter of 2013 and 9.5 percent over the year.
- An income shock to a household—such as unexpected unemployment—can affect the household's ability to repay a mortgage. In September 2013, the unemployment rate (NSA) in Maryland was 6.2 percent, remaining below the national 7.0 percent mark, while in D.C. the jobless rate was 8.6 percent. (Table 12)

## Maryland Counties

## **Sources and Notes**

### **House Price Index**

*Federal Housing Finance Agency/Haver Analytics*

Weighted repeat sales index, measuring the average price changes in repeat sales or refinancing on the same single family properties. Based on transactions involving conforming, conventional mortgages purchased or securitized by Fannie Mae or Freddie Mac.

### **Unemployment Rate**

*Bureau of Labor Statistics/Haver Analytics*

### **General Housing Statistics**

*Census Bureau*

### **Metropolitan Statistical Area Definitions**

*Office of Management and Budget, 2008*

### **Loan Distribution and Loan Performance**

*(1) Mortgage Bankers' Association/Haver Analytics*

*(2) Loan Processing Services Inc. Applied Analytics Mortgage Data*

Loan Processing Services, Inc. periodically enhances the LPS mortgage data by adding servicers. Additional servicers can change past performance numbers. Therefore, rates in this edition of the Mortgage Performance Summaries may differ from those in previous editions.
