**An Update on Housing Market and Mortgage Performance in South Carolina
2nd Quarter, 2013
Summary of Findings**

This report analyzes the size, composition, and performance of prime and subprime home mortgages in South Carolina. It also provides information on trends in the region's housing market and charts with metropolitan area and county level data.

State Delinquency and Foreclosure Rates

- Foreclosure and delinquency rates in South Carolina declined in the second quarter of 2013 and over the preceding year, a further manifestation of a housing recovery in the state.
- The share of mortgages with payments more than 90 days past due in South Carolina fell 0.3 percentage point to 2.3 percent from June 2012 to June 2013. Meanwhile, the foreclosure rate dropped from 4.1 percent to 2.9 percent over the same period. (Table 7)
- The prime foreclosure rate in South Carolina declined from 3.7 percent to 2.7 percent over the year ending in June 2013. During the same period, the prime 90+ day delinquency rate ticked down from 2.4 percent to 2.2 percent. (Table 8)
- The subprime foreclosure rate in South Carolina fell from 14.5 percent to 8.4 percent over the year ending in June 2013. The 90+ day delinquency rate also declined over the year, from 8.0 percent to 6.7 percent. (Table 9)
- Subprime mortgages make up 30.8 percent of the foreclosure inventory in South Carolina but only 10.8 percent of all mortgages. South Carolina is ranked 17th in the nation in its share of subprime loans. (Figure 2 and Table 4)

Metro Area Highlights

- Coastal areas of South Carolina, such as Myrtle Beach and Hilton Head Island, continued to report the highest default rates in the state in June 2013. The Myrtle Beach and Hilton Head Island MSAs both posted total foreclosure rates over 3.6 percent and prime rates above 3.4 percent while their subprime rates were 11.9 percent and 9.2 percent, respectively. Hilton Head Island also had the highest share of adjustable rate and interest only mortgages of all areas in South Carolina. (Tables 6, 7, 8 and 9)
- Between June 2012 and June 2013, total foreclosure and 90+ day delinquency rates decreased in all metro areas in the state. (Table 7)

State Economic Conditions and Looking Forward

- Rising house prices can help to reduce the possibility of mortgage delinquency or foreclosure. According to the Federal Housing Finance Agency, house prices in South Carolina increased 0.1 percent in the second quarter of 2013 and 0.8 percent over the year.
- Lower rates of unemployment can also reduce the likelihood of mortgage default since job loss can affect a household's ability to repay. The South Carolina unemployment rate (NSA) was one of the highest in the country for a few years, peaking at a state record of 12.5 percent in January 2010. However, by June 2013 it had fallen to 8.7 percent. (Table 11)

For more information on foreclosures, please visit the Richmond Fed's Foreclosure Center at http://www.richmondfed.org/community_development/foreclosure_resource_center/
For recent data on the South Carolina economy, please visit the Richmond Fed's *Snapshot* publication at http://www.richmondfed.org/research/regional_economy/reports/snapshot/index.cfm

Loan Distribution and Loan Performance

(1) Mortgage Bankers' Association/Haver Analytics

(2) Loan Processing Services Inc. Applied Analytics Mortgage Data

Loan Processing Services, Inc. periodically enhances the LPS mortgage data by adding servicers. Additional servicers can change past performance numbers. Therefore, rates in this edition of the Mortgage Performance Summaries may differ from those in previous editions.
