An Update on Housing Market and Mortgage Performance in South Carolina
1st Quarter, 2014
Summary of Findings

This report analyzes the size, composition, and performance of prime and subprime home mortgages in South Carolina. It also provides information on trends in the region's housing market and charts with metropolitan area and county level data.

State Delinquency and Foreclosure Rates

- Foreclosure rates in South Carolina declined in the first quarter of 2014 and over the preceding year. The 90+ day delinquency rate also fell in the quarter and over the year.
- The foreclosure rate fell from 3.4 percent to 1.9 percent in South Carolina from March 2013 to March 2014. Meanwhile, the share of mortgages with payments 90+ days past due over edged down 0.1 percentage point to 2.4 percent over the same period. (Table 7)
- The prime foreclosure rate in South Carolina declined from 3.2 percent to 1.9 percent over the twelve months ending in March 2014. During the same period, the prime 90+ day delinquency rate was unchanged at 2.4 percent. (Table 8)
- The subprime foreclosure rate in South Carolina fell from 10.0 percent to 4.7 percent from March 2013 to March 2014. The 90+ day delinquency rate also declined from 7.4 percent to 5.5 percent over the period. (Table 9)
- In the first quarter of 2014, subprime mortgages made up 32.8 percent of the foreclosure inventory in South Carolina but only 8.4 percent of all mortgages. South Carolina is ranked 24th in the nation in its share of subprime loans. (Figure 2 and Table 4)

Metro Area Highlights

- The Myrtle Beach metro area posted the highest total foreclosure rate of 2.2 percent in March 2014 followed by Hilton Head Island, Charleston, and Columbia at 2.0 percent. Additionally, the Hilton Head Island metro area had the highest percentage of adjustable rate and interest only mortgages in the state. (Tables 6 and 7)
- In March 2014, the Myrtle Beach MSA posted the highest subprime foreclosure rate of 6.0 percent followed closely by the Charleston MSA with 5.8 percent while Columbia reported the highest 90+ day delinquency rate of 7.2 percent. (Table 9)

State Economic Conditions and Looking Forward

- Rising house prices can help to reduce the possibility of mortgage delinquency or foreclosure. According to the Federal Housing Finance Agency, home values in South Carolina appreciated 0.3 percent in the first quarter of 2014 and 1.1 percent over the year.
- Lower rates of unemployment can also reduce the likelihood of mortgage default since job loss can affect a household's ability to repay. The South Carolina unemployment rate (NSA) fell from 7.7 percent in March 2013 to 5.4 percent in March 2014—the largest decline of any state over those twelve months. (Table 11)

For more information on foreclosures, please visit the Richmond Fed's Foreclosure Center at http://www.richmondfed.org/community_development/foreclosure_resource_center/

Notes: FHA and VA loans as well as interest only loans are included in the count of prime loans.
Source: Housing units are reported in the 2010 Census. Mortgage estimates are Federal Reserve Bank of Richmond calculations using data from Lender Processing Services (LPS) Applied Analytics (March 2014).
Definitions of the metropolitan areas are provided later in the document.
*The figure for owner-occupied units with a mortgage at the national level is calculated by summing the totals for the states.

Loan Distribution and Loan Performance

(1) Mortgage Bankers' Association/Haver Analytics

(2) Loan Processing Services Inc. Applied Analytics Mortgage Data

Loan Processing Services, Inc. periodically enhances the LPS mortgage data by adding servicers. Additional servicers can change past performance numbers. Therefore, rates in this edition of the Mortgage Performance Summaries may differ from those in previous editions.
