An Update on Housing Market and Mortgage Performance in Virginia
4th Quarter, 2013
Summary of Findings

This report analyzes the size, composition, and performance of prime and subprime home mortgages in Virginia. It also provides information on trends in the state's housing market and charts with metropolitan area and county level data.

State Delinquency and Foreclosure Rates

- The total foreclosure rate in Virginia edged down 0.5 percentage point over the year to end at 0.7 percent in December 2013. Over the same period, the 90+ day delinquency rate edged down 0.3 percentage point to 2.0 percent. (Table 7)
- The prime foreclosure rate in Virginia declined from 1.1 percent to 0.7 percent over the year ending in December 2013. Over the same period, the prime 90+ day delinquency rate fell from 2.1 percent to 1.9 percent. (Table 8)
- The subprime foreclosure rate fell from 4.2 percent in December 2012 to 1.8 percent in December 2013 while the delinquency rate fell from 8.3 percent to 6.3 percent. (Table 9)
- Subprime mortgages make up 28.5 percent of Virginia's foreclosure inventory but only 7.0 percent of all mortgages. Virginia is ranked 36th in the nation in its share of subprime loans. (Figure 2 and Table 4)

Metro Area Highlights

- The Winchester MSA had the highest subprime foreclosure rate in the state (3.2 percent) in December. However, the Richmond MSA, followed by the Virginia Beach MSA, had the highest share of subprime mortgages with payments more than 90 days past due (8.1 percent and 7.3 percent, respectively). (Table 9)
- The Virginia Beach MSA posted the highest prime foreclosure rate in the state in December (1.0 percent) and also had the highest 90+ day delinquency rate of 2.7 percent. (Table 8)
- The Virginia portion of the Washington, D.C. MSA continued to post the highest share of adjustable rate and interest-only mortgages in the state although the Danville metro area had the highest share of subprime loans (5.3 percent) in December. (Table 6)

State Economic Conditions and Looking Forward

- Rising house prices can help to reduce the possibility of mortgage delinquency or foreclosure. According to the Federal Housing Finance Agency, house prices in Virginia were unchanged in the fourth quarter of 2013 but increased 1.3 percent over the year.
- Lower rates of unemployment can also reduce the likelihood of mortgage default since job loss can affect a household's ability to repay. The Virginia unemployment rate (NSA) was 4.8 percent in December 2013. Joblessness in the state has remained well below the national unemployment rate, which currently stands at 6.5 percent. (Table 11)

For more information on foreclosures, please visit the Richmond Fed's Foreclosure Center at http://www.richmondfed.org/community_development/foreclosure_resource_center/
For recent data on the Virginia economy, please visit the Richmond Fed's *Snapshot* publication at http://www.richmondfed.org/research/regional_economy/reports/snapshot/index.cfm

Notes: FHA and VA loans as well as interest only loans are included in the count of prime loans.

Source: Housing units are reported in the 2010 Census. Mortgage estimates are Federal Reserve Bank of Richmond calculations using data from Lender Processing Services (LPS) Applied Analytics (December 2013). Definitions of the metropolitan areas are provided later in the document.

*The figure for owner-occupied units with a mortgage at the national level is calculated by summing the totals for the states.
