

OPPORTUNITY OCCUPATIONS REVISITED

Exploring Employment for Sub-Baccalaureate Workers Across Metro Areas and Over Time

PHILADELPHIA-CAMDEN-WILMINGTON, PA-NJ-DE-MD

New research explores the economic opportunity available in 121 of the largest metro areas in the U.S. The report defines **opportunity employment** as jobs accessible to workers without a bachelor's degree and typically paying above the national annual median wage (\$37,690), adjusted up or down to reflect the local cost of living. Occupations characterized by a high level of opportunity employment are called **opportunity occupations**. Nationally, the research finds that 21.6 percent of total employment can be classified as opportunity employment — a figure that varies greatly across the metro areas analyzed. In this region and nationally, the largest opportunity occupations represent a true cross section of the jobs available in today's economy.
