

## **Historical Data Files for the Fifth District Regional Business Conditions Surveys**

Includes Services and Manufacturing

Historical monthly data for the Monthly Business Conditions Survey diffusion indexes are available from November 1993 to the most current month. The starting month for each NSA and SA series corresponds to the month and year the survey question was introduced. The columns in the accompanying data file correspond to the following variables where:

- `_c` = for a current variable, or
- `_e` = for an expected (six-month forecast) variable
- `nsa` = not seasonally adjusted
- `sa` = seasonally adjusted
- “N/A” = not reported

For example, “`sa_mfg_ship_c`” is the seasonally adjusted diffusion index for current manufacturing shipments.
